hardWood Clip™ hidden fasteners : **Extreme4™**

Hidden fasteners for wood decks

Extreme™ ExtremeKD™ Extreme4™

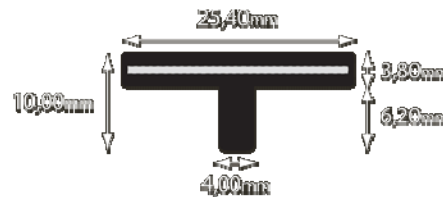

Benefits of hidden fasteners

- Quick and easy installation
- Highly Resistant and Unbreakable
- SPAX® self-tapping screw
- Beauty and Safety
- Universal

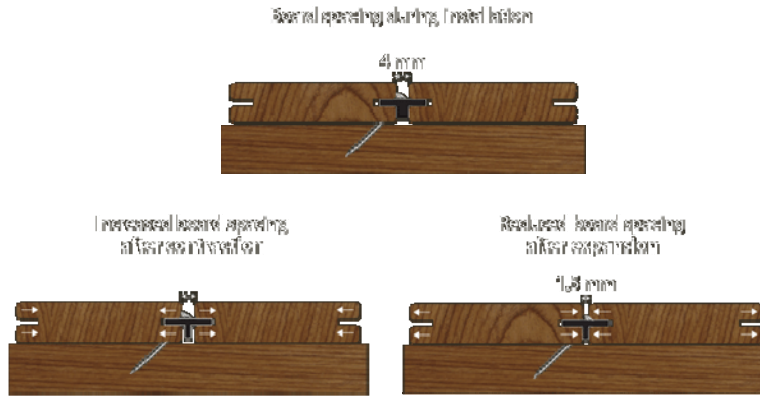

The **Extreme4™** model is part of the range developed for professionals. Its square shape and the stainless steel insert in the moulded fastener provide exceptional resistance. With 4 mm spacing between the boards, the **hardWood Clip™ Extreme4™** fastener is designed to let wood boards both expand and contract.

When wood with the appropriate moisture content is used, the **Extreme4™** fastener ensures that there are no abnormally large gaps between boards and that they don't abut against each other either.
